

KICK-OFF 'Building Brussels'

The interdisciplinary research team 'Building Brussels' kindly invites you for its official kick-off meeting on Friday **June 9th 2017**.

Building Brussels is a VUB-funded research project that investigates the role of SMEs in Brussels' urban fabric, with a particular interest in the **construction sector**. In order to fundamentally grasp its specificity,

the research will intertwine multiple disciplines: construction history, urban planning, architectural engineering and business history. Seen its societal relevance, we warmly invite you as a stakeholder to **participate** in the event and the debate.
